

KEERTHANA R

Senior Software Developer

Chennai, India | +91-8310893427 | keerthanaravindran301@gmail.com | [https:// linkedin.com/in/keerthana-r-3003871bb](https://linkedin.com/in/keerthana-r-3003871bb) | <https://github.com/Keerthana301>

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience designing and delivering scalable fintech and enterprise applications. Proficient in PHP/Laravel for backend development and React.js/Vue.js for frontend development, with hands-on experience building REST and GraphQL APIs on MySQL and MongoDB. Proven track record delivering high-volume transaction systems, payout automation platforms, currency exchange solutions, payroll systems, and multi-company reporting hubs. Strong understanding of SDLC, Agile practices, API integrations, authentication (Keycloak SSO, RBAC), database optimization, and secure application development. Currently pursuing an M.Tech in Computer Science and Information Security at IIT Madras.

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, JavaScript, React.js, Vue.js, Python, Django

APIs & Integration: REST APIs, GraphQL, Postman

Databases: MySQL, MongoDB

Security & Auth: Keycloak SSO, RBAC, Secure Application Development

Tools & Practices: Git, Agile/SDLC, Code Review, CI/CD Support

WORK EXPERIENCE

Senior Software Developer — Paybrook Payments Tech Private Limited

Jun 2024 – Present

- Led development and enhancement of Laravel-based Domestic Money Transfer (DMT) and Payout Management Systems.
- Developed API-driven automated payout solutions processing 20,000+ daily transactions with 99.9% uptime.
- Built a cross-border currency exchange platform with real-time currency conversion and transaction management.
- Improved recharge management systems, reducing transaction failures through system optimizations.
- Built a Payroll Management System supporting salary processing, tax calculations, and compliance reporting.
- Developed a Multi-Company Report Hub with centralized reporting and role-based access controls.
- Implemented secure authentication and authorization mechanisms across enterprise applications.
- Participated in sprint planning, code reviews, testing, deployment, and production support; authored technical and system architecture documentation for critical modules.

Software Developer — Paysmart Payment Technologies Private Limited

Apr 2023 – Jun 2024

- Developed and maintained payout transaction management systems using Laravel.
- Built reusable backend services and RESTful APIs following PSR coding standards.
- Collaborated with QA and UI/UX teams to ensure smooth product releases.
- Assisted with database design, optimization, and troubleshooting of production issues.
- Prepared technical documentation and implementation guides for future enhancements.

KEY PROJECTS

Domestic Money Transfer (DMT) System

- Developed a secure, scalable money transfer platform using Laravel with customer verification, transaction tracking, wallet deduction, and audit logging.
- Built REST APIs for transaction processing and reporting, ensuring compliance with financial regulations and security standards.

Payout Management System

- Developed an automated payout platform supporting bulk transfers and real-time transaction tracking.
- Integrated multiple financial APIs into a centralized payout engine with role-based access control and multi-level approval workflows.

Currency Exchange & Cross-Border Management Platform

- Designed a cross-border transaction platform supporting multi-currency and cryptocurrency operations.
- Implemented deposit, withdrawal, verification, and approval workflows, plus user account management with currency-specific configurations.

Integrated Enterprise Management System (IEMS)

- Developed Task Management modules within a large-scale enterprise application.
- Integrated Keycloak Single Sign-On for centralized authentication and authorization.
- Designed RESTful APIs supporting task creation, assignment, workflow tracking, and reporting.

Multi-Company Report Hub

- Developed a centralized reporting platform for multiple organizations with dynamic filtering and role-based access control.
- Enabled PDF/CSV export and integrated external and internal APIs for data synchronization.

EDUCATION

M.Tech, Computer Science and Information Security

In Progress

Grade: 6.5/10

B.Tech / B.E., Computer Science and Engineering

Grade: 8.9/10

12th Standard (CBSE)

Marks: 86%

10th Standard (CBSE)

Marks: 98%

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Data Analytics Fundamentals – Amazon
- Machine Learning Onramp – MATLAB
- Data Analytics with Python – NPTEL
- Data Science for Engineers – NPTEL, IIT Madras
- Process Automation Bootcamp – Celonis Academy
- Data Analytics and ChatGPT in Analysis – Simplilearn
- Virtual Internship in Data Analytics & Visualization – Accenture (Forage)
- Power BI Masterclass – OfficeMaster

ACHIEVEMENTS & ACTIVITIES

- NPTEL Enthusiast Star Award recipient.
- Presented research work at the NCVCS International Conference.
- Participant, Flipkart Grid Software Development Challenge.
- Participant, Bugs and Bytes Hackathon by Riskcovry.
- Attended ISRO Workshop on Deep Learning in Ecosystems.
